Mobile Apps - IOS Developer

We are looking for a Senior iOS Developer to join us in our Product Development Hub in Malta. You will be part of the Mobile Apps team and together we will build the best native experience in the industry.

The Wow
- At Betsson Group, we strive to deliver the best customer experience in the industry. We are one of the market leaders in iGaming, offering online gaming products in several markets, both through our gaming sites as well as several partner brands.
- You will be part of a passionate team, which is building an industry-leading, scalable, multi-brand platform to support 25+ online brands! Our brands are used by hundreds of thousands of users and growing.

What we are looking for
- You will be working side by side with some of the greatest talents in the industry.
- You will be working on applications dealing with high traffic reaching worldwide audiences.
- You will be able to feel strong ownership of the things we deliver and our success.
- A friendly and supportive environment; professional development programs and training will help you achieve your goals and grow both technically as well as professionally.
- In addition to all of this, you will be part of the multi-cultural Betsson community.

Great if you have
- Swift, Xcode, and expert in Apple's frameworks and possibilities with native
- Firebase and all tools included such as analytics, Crashlytics, Firestore, Remote configuration, cloud-messaging, and in-app-messaging.
- Being data-driven and having excellent knowledge in structuring tracking in app
- RESTful APIs and using Postman.
- Github pipeline setup
- An eye for making high-quality iOS views and animations.
- Scalable and performant applications
- Design and implement clean, scalable, and high-quality code with unit testing experience.
- Solving problems and having good software architecture knowledge.
- Being a Team player.
- Agile development.
- Coaching and mentoring other developers.

A taste of what you will be involved with
- We want to be pioneers in a highly competitive market, so we continuously strive for technical and product excellence. As part of our team, you will be building new products and features using the latest technologies; actively contributing to a state-of-the-art native, which is supporting our core brands.
- Our iOS Mobile Apps are built in Swift and consume RESTful APIs.

- As an iOS Developer, you will be responsible for software development in a very self-leading Agile team, responsible for everything from DevOps pipeline to production monitoring and support.
- You will be contributing directly to the success of our products through close collaboration with UX designers, QA engineers, data analysts, and other area teams. You have a strong sense of customer value and will participate in the whole value-chain discussion to contribute to how and what to make our products successful.

Relocation

Starting a new job is always an adventure. When you relocate with us, we will provide you with a package with paid flights, a company apartment where you can stay rent-free for a month, and a relocation allowance. We have an extensive onboarding program where you get training before you start your new job, and there is always someone there for you to answer any questions you may have.
